Hi Sherry,

Yes, Ray is scrambling to get everything done. I spoke to him this afternoon about Tower and he will try to fund it at the present estimate from BERS, but he won't know until later this week. He said that he would let us know as soon as he can. I think with the thoroughness of the PECFA field work, we may be able to save some money off that estimate, but so much is still up in the air.

No Tower field work is on the schedule yet. Preston's is set for the last full week of the month-Oct.26. and Rosebush is set to start on Nov. 9.

Bob,

I spoke to Ray Worley when I was in Phoenix. He seems like he is doing his very best to try to figure out the financial situation that he inherited from Lynn DePont.

I have been told that if the government is shut down because of a budget impasse that we will not work. The only exception to that is for an emergency. I was arguing that Tower Standard is the only activity that would require you to work and monitor BERS in the field during the month of October. Is this correct?
